-----------	---------------	--	--

Dear Mr. Baars,

Through this letter we like to express our positive opinion and experiences about the Pronomar - Merus Rings we have installed in our domestic water system. Since the installation early December 2009 we have noticed a significant improvement of the water quality.

This shows itself in the amount of Calcium deposits in the bathroom areas as well as in the deposits in the water tanks of the separators we use (Alfa Laval PA 605). Before the installation of the Merus Rings we had to clean the water tanks and water parts of the separators on regular basis. Since the installation we can extend this maintenance until the regular maintenance interval of the separators.

Yours sincerely,

Marcel Visser
Chief Engineer
Shoreway
