

DRYER AIR FOR BOOTS, SHOES AND GLOVES

Page | 1 **Personal Protective equipment is used day in day out, intensively, and in greatly varying temperature and weather conditions. The result: wet clothes and boots. To start the next shift in comfortable attire, Pronomar is supplying an ingenious drying system.**

Pronomar's robust systems will dry your PPE the easy way. The footwear but also the gloves, life vests and other equipment is dried from the inside out by means of warm air. The drying is fast and gentle, so that your valuable equipment receives the careful treatment it deserves.

WARM AIR DRYING SYSTEM

Advantages

- + dry and hygienic equipment
- + lifespan PPE extends by 2-3 times
- + improvement for work and leisure
- + drying from inside-out
- + robust, nearly indestructible system
- + space-saving
- + easy-to-operate
- + reduction of bacteria and odours
- + plug and play

Features

- + brushless, digital blower unit
- + new FLOW300 setting screw for stepless air flow adjustment (0-100) and tool-free filter change
- + no wear and tear parts
- + designed for continuous use
- + equal and constant air flow
- + low energy consumption
- + available with wind-up timer 6h or socket timer 24h

You wear it,
we dry it!

The stainless steel boot dryers AIR are connected to the warm-air blower FLOW300. They are optionally available with timers. This ensures an easy handling of the systems, so that by switching on the timers everybody can quickly start the dryers. Pronomar's range is available from 5 up to 30 pairs, in a single or double sided configuration. The system is suitable for the drying of not only boots, but also gloves, helmets, life vests and other types of equipment. Please ask for the possibilities.

BOOT DRYER AIR
for boots, shoes, gloves, helmets, life vests, masks etc.

15 pairs	W 61 x H 160 x D 37 cm	PX30.15.B.FLOW
10 pairs	W 41 x H 160 x D 37 cm	PX30.10.B.FLOW
5 pairs	W 20 x H 160 x D 37 cm	PX30.05.B.FLOW
5 pairs	W 51 x H 55 x D 37 cm	PX30.05.BL.FLOW

PX30.20.B.FLOW

PX30.10.B.FLOW

PX30.05.BL.FLOW

💡 PX30.03.BG.FLOW
available as combination console for 3 pairs of boots and 3 pairs of gloves

💡 available also as freestanding or mobile configuration (single or back-to-back)

Air blower FLOW300

A warm and fast drying of all footwear by using a large amount of air, which flows through the continuous stainless steel framework and rounded hangers. The hangers contain nozzles, through which the air enters the boots. One of the main advantages of drying with slightly warmed up air is that it is particularly gentle on materials such as leather and high-tech fabrics. Finally, because of the equal and constant air flow, all footwear is dried within a short amount of time approx. 1-2 hours, ensuring that the people can start their next shift warm and dry.

NEW: setting screw for stepless air flow adjustment (0-100) and tool-free filter change

For more technical details and information please see our product information on "Warm-air blower FLOW300".
